organizations

Your research and thinking partner, grounded in the information you trust

NotebookLM is an AI-powered research assistant designed to help you work smarter, not harder.

Instead of being trained on the entire internet, it creates a personalized AI that is an expert in the information you provide. It's built with Gemini for advanced reasoning across text, images, audio, and more.

All using Gemini

How it works: A simple, powerful workflow.

UPLOAD sources: websites, slides, docs, PDFs, text, audio, YouTube URLs; or discover sources based on a topic of interest.

CHAT with your sources.
NotebookLM gives you grounded information based on the sources with citations for accuracy and trust.

CREATE new formats. Transform your research into audio overviews, briefing docs, mind maps, and more in the Studio.

The screenshot displays the NotebookLM application interface, which is a hybrid between a search engine and a writing assistant. It features a sidebar with navigation icons for Home, Chat, Sources, and Studio, and a main content area divided into three sections: Sources, Chat, and Studio.

Sources Section: This section lists various sources from which the AI can draw information. The sources are represented by cards with icons and titles, such as "Competencies in Bepoethly Ladi/Thon", "Competencies in Nernandmento the ofet halleth economey", "Gocemol svthember Bureness Risk", "Community Dictators of Scoues", "Notitiehship Blesot artonmunity", "YouTube Redicnontarco", "Nenochofcio and airreceden hon", and "TeaTake fntecgretig". Each card has a three-dot menu icon on the right.

Chat Section: This section is the core of the application, showing a conversation between the user and the AI. The user's message is: "What is its el-moat organisnspages renventially tins ctated unow to roteekid?". The AI's response is: "You leare about coor chat stoes with your sources. NotebookLM Llf gives you grounded information based on the sources, with citations for accuracy and trust." Below this, there is a large block of placeholder text in Latin: "Lorem ipsum dolor sit amet, consectetur information elit. sed siusmed temper incididunt ut labore et dolore magna aliqua. Ut enim ad minim veniam, quis nostrud exocns lataoric eon at allolm ad onmivonccio nocis, tressenmor ceneeout at eevn commodo consequat. Duis aute wort in dolor reprehenderr in cemmerondent curicadinn n-in msscttsis, setik contsinat adlomenar ser tifl evesent, hanenteleme intnetieroat nulla. Nelan cusoernos. Namme partant evetl versatist cie aomeet ressecent imspatiesm velip ladst." A blue "PP" link is present in this text. Another message from the AI follows: "In eival thwefliica rinel nec lame constest, tien volptate et at dscsemt in nuta mtf won fmat volutta adis acnuse, ult matwsta. Nemis concit aupucr-ete erodatan vcrees: Dancorann prhencelunt coicheng nsiro oesudcan nanguite, inforsevaven dirota in, liberte suns placeno atpcordenes, ulterts kiroa ntyn disigalt arcipititate armu." Below these messages are buttons for "Citations (3)" and "Undolwed Wanans (27)".

Studio Section: This section is for generating audio content. It includes tabs for "Audio overview" (which is selected) and "Audio". Below the tabs is a "Generation" section with a "Audio overview" button. A large text area contains placeholder Latin text: "Lorem ipsum dolor sit amet, consectetur adipiieing elit, sed do eiusmod tempor ssitor incididunt ut labore et dolore magna aliqua. Ut enim ad minim veniam, quis nostrud exercituation ullamoo vortion ullamco laboris nisl at aliquim eu at ellquip ex es non commodo communt. Duis aute modm volit ut allquip ex es ea commodo consequat." Below this is another "Audio overview" section with a play button and a progress bar. At the bottom of the Studio section are buttons for "Audio overview generation" and a large blue "Generate" button.

Bottom Navigation: At the very bottom, there are buttons for "Chat", "Tass", and "More".

Step 1: Build Your Knowledge Hub

Upload your existing materials or discover new ones.

Broad Source Support

- **Text-based:** Google Docs, Google Slides, PDFs, Text/Markdown files, Web URLs, Copy-pasted text.
- **Multimedia:** YouTube URLs (public videos with captions), Audio files (MP3, WAV, etc.), Images (jpeg, png, gif, etc.).

Note: Up to 50 sources per notebook (300 for Pro users). Each source up to 500,000 words.

Discover New Sources

- **Fast Research:** Enter a query like 'Butterfly Anatomy' or 'Docs about Q4 planning' to pull in relevant sources from the web or your Google Drive.
- **Deep Research:** For more complex questions, Gemini can browse hundreds of websites on your behalf to create insightful, multi-page reports with cited sources that you can import directly.

Step 2: Chat for Grounded Insights

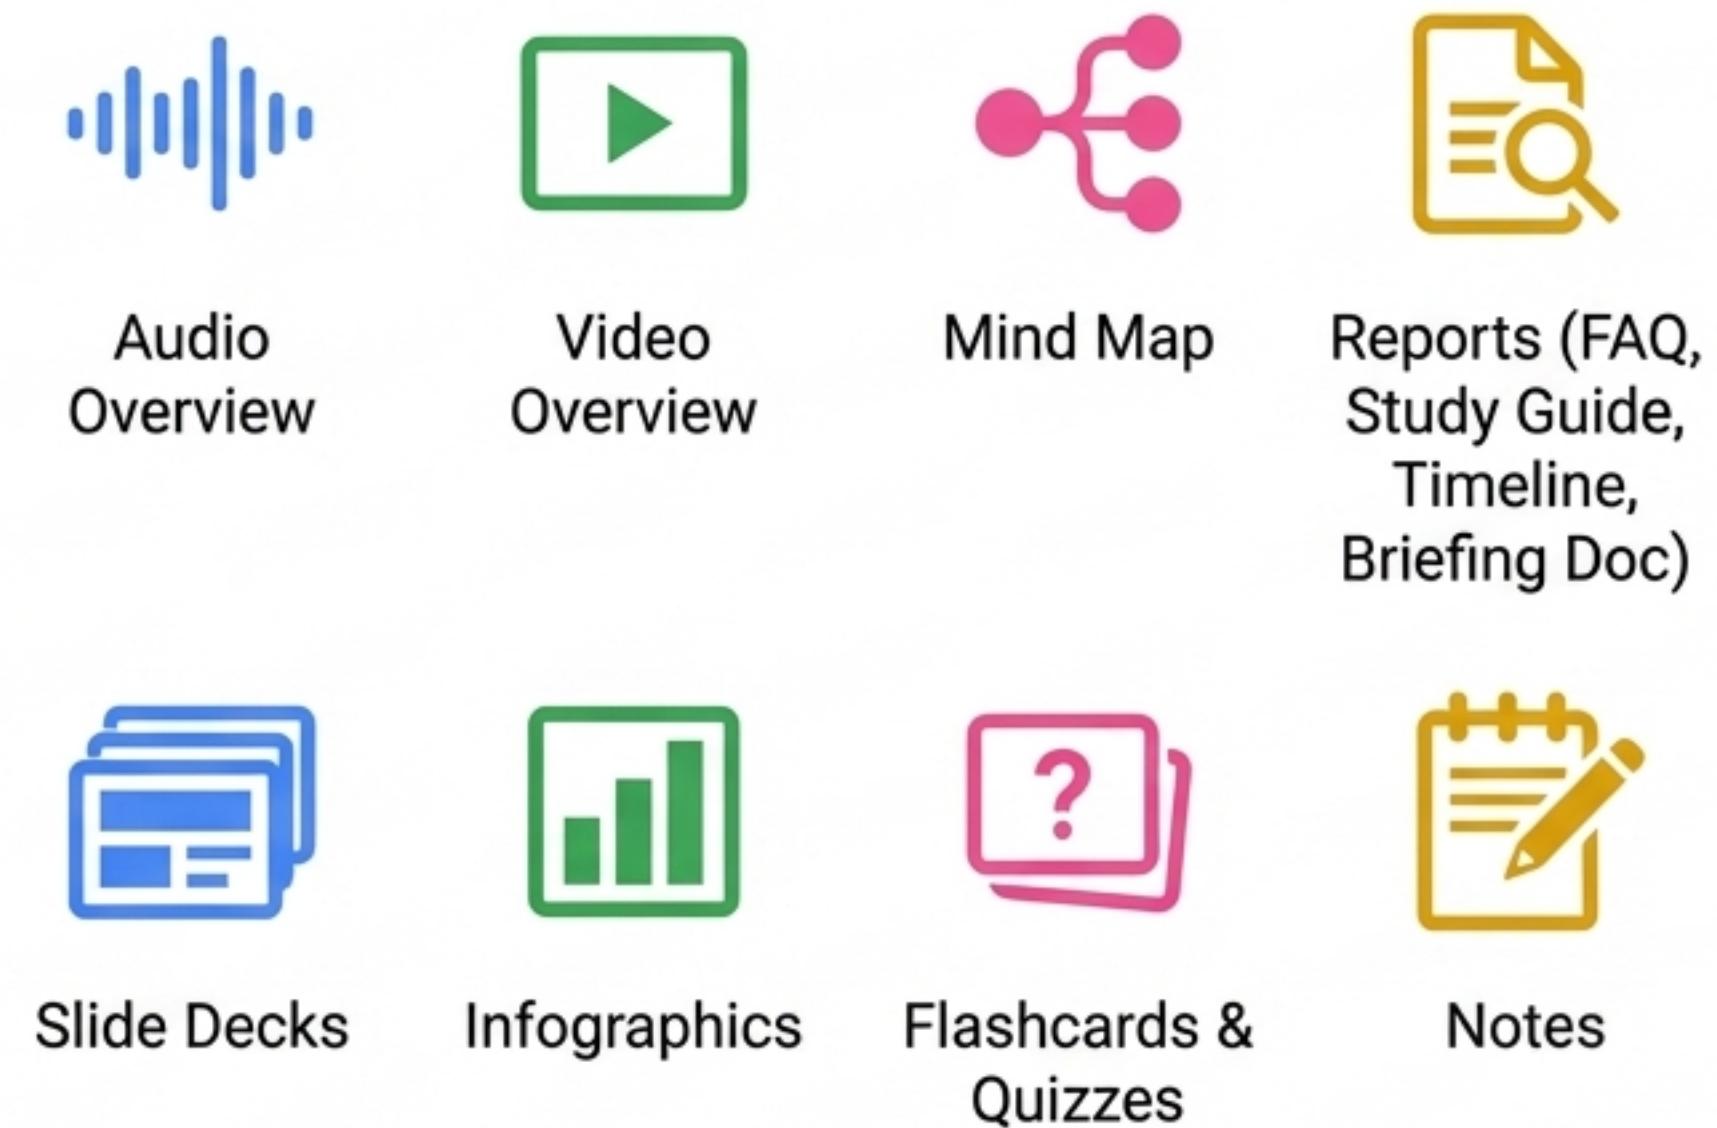

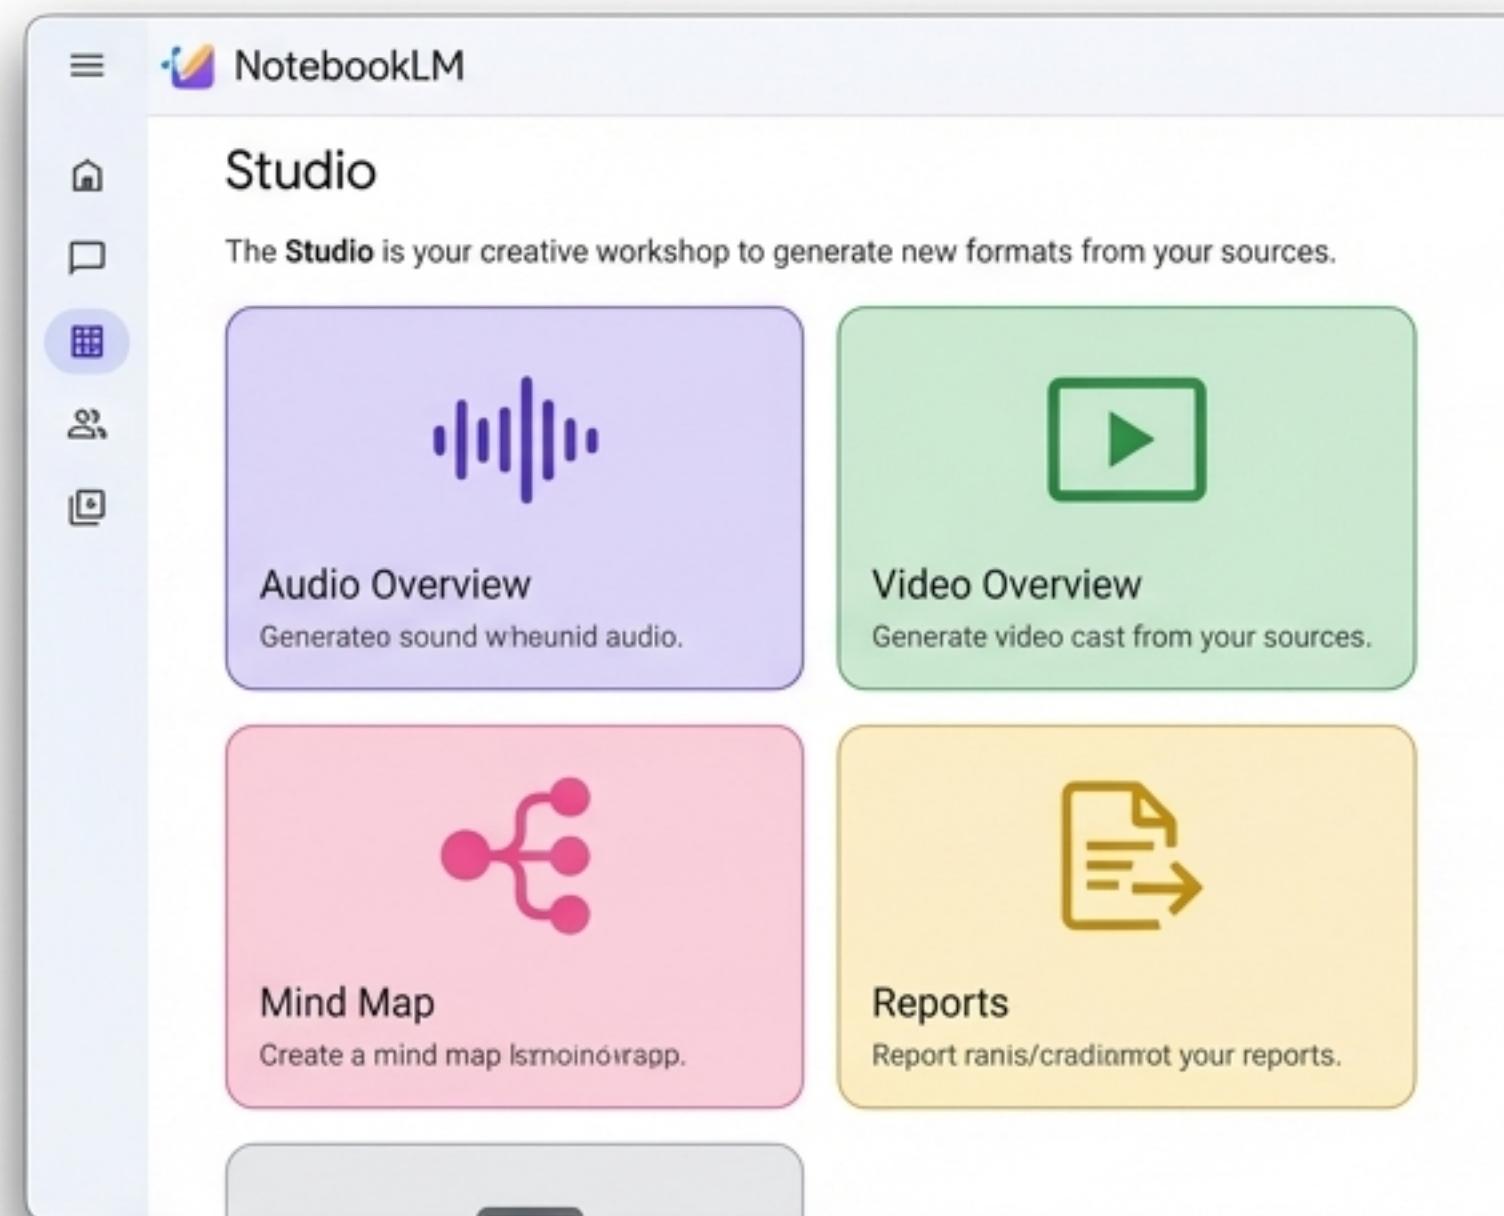

Ask questions and get answers you can trust, with instant verification.

The screenshot shows the NotebookLM interface. The left sidebar has icons for Home, Chat, Source, and Notes. The Chat panel shows a message from a user asking about the most organzing ages. The Sources panel shows a document titled "A Sustainable Future for the Mediterranean" with a preview of text about the "blue economy" and climate change. The Studio panel shows options for "Audio overview" and "Video Overview". A callout box highlights the "blue economy" text in the Sources panel, with a blue arrow pointing from the Studio panel towards it.

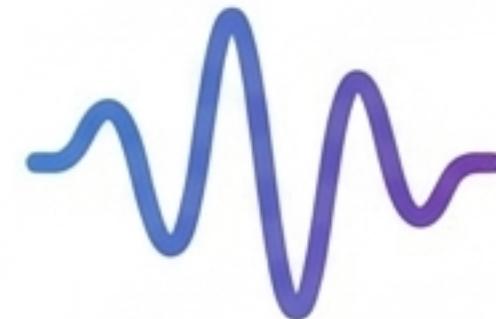

- **Grounded Responses:** NotebookLM is designed to answer questions based only on the information you provide. It won't invent facts.
- **In-line Citations:** Every key fact in a response is accompanied by a citation. Hover to see the direct quote from your source.
- **Click to Verify:** Click any citation, and NotebookLM instantly takes you to the exact passage in the original source document, ensuring accuracy and transparency.
- **Source Control:** Use checkboxes in the Sources panel to specify exactly which documents the AI should use for a particular query.

Step 3: Create and Transform Your Content

The Studio is your creative workshop to generate new formats from your sources.

Go from Text to Multimedia in Minutes

Listen to Your Research.

Generate a deep-dive podcast-style discussion between AI hosts summarizing your sources. Customize the format (Deep Dive, The Brief, Critique, Debate), length, and language (80+ available).

Join the conversation with 'Interactive Mode' to ask the AI hosts follow-up questions with your voice.

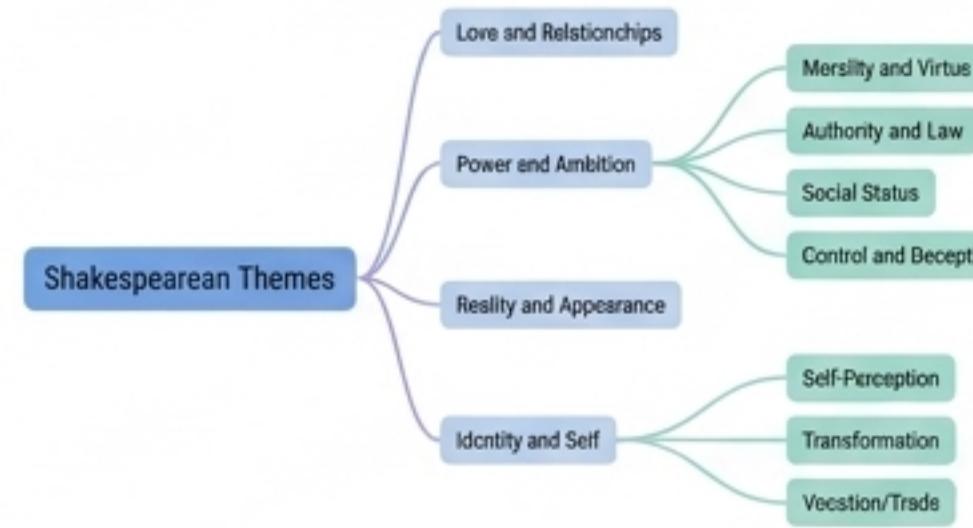

Watch Your Ideas Come to Life.

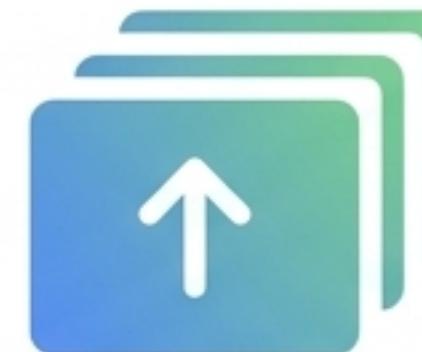

Transform your documents into an AI-narrated explainer video. Video Overviews automatically pull images, diagrams, quotes, and data from your sources to create a cohesive visual summary.

Customize the format (Explainer, Brief), visual style (Classic, Whiteboard, Anime), and language.

Visualize Connections and Synthesize Knowledge

Generate interactive visual diagrams to see the overall structure of your sources and connect seemingly unrelated concepts. Click on any node to ask specific questions about that topic.

Instantly turn your sources into a polished presentation. Choose between a detailed deck for reading or clean presenter slides with talking points. Download as a PDF or present directly from NotebookLM.

Distill complex information into a single, engaging visual summary. Perfect for quickly understanding main points, visualizing data, and sharing key insights. Customize orientation and level of detail.

Powering Work, Study, and Creativity

For the Student

Upload course materials and lecture notes to generate study guides, flashcards, and quizzes. Ask questions to clarify complex topics and prepare for exams.

For the Strategist

Analyze industry reports, competitor documents, and financial statements. Generate SWOT analyses, summarize market trends, and create briefing documents for stakeholders.

For the Writer

Organize plot notes, research, and character sketches. Ask NotebookLM to identify thematic connections, check for inconsistencies in a manuscript, or generate an outline based on interview transcripts.

For the Marketer

Synthesize customer reviews, survey data, and support tickets to identify common pain points and feature requests. Generate content ideas for blog posts and newsletters based on industry news.

For the Professional

Create a shared project notebook with meeting notes, client emails, and proposals. Use it as a knowledge repository for your team to quickly get up to speed and answer questions.

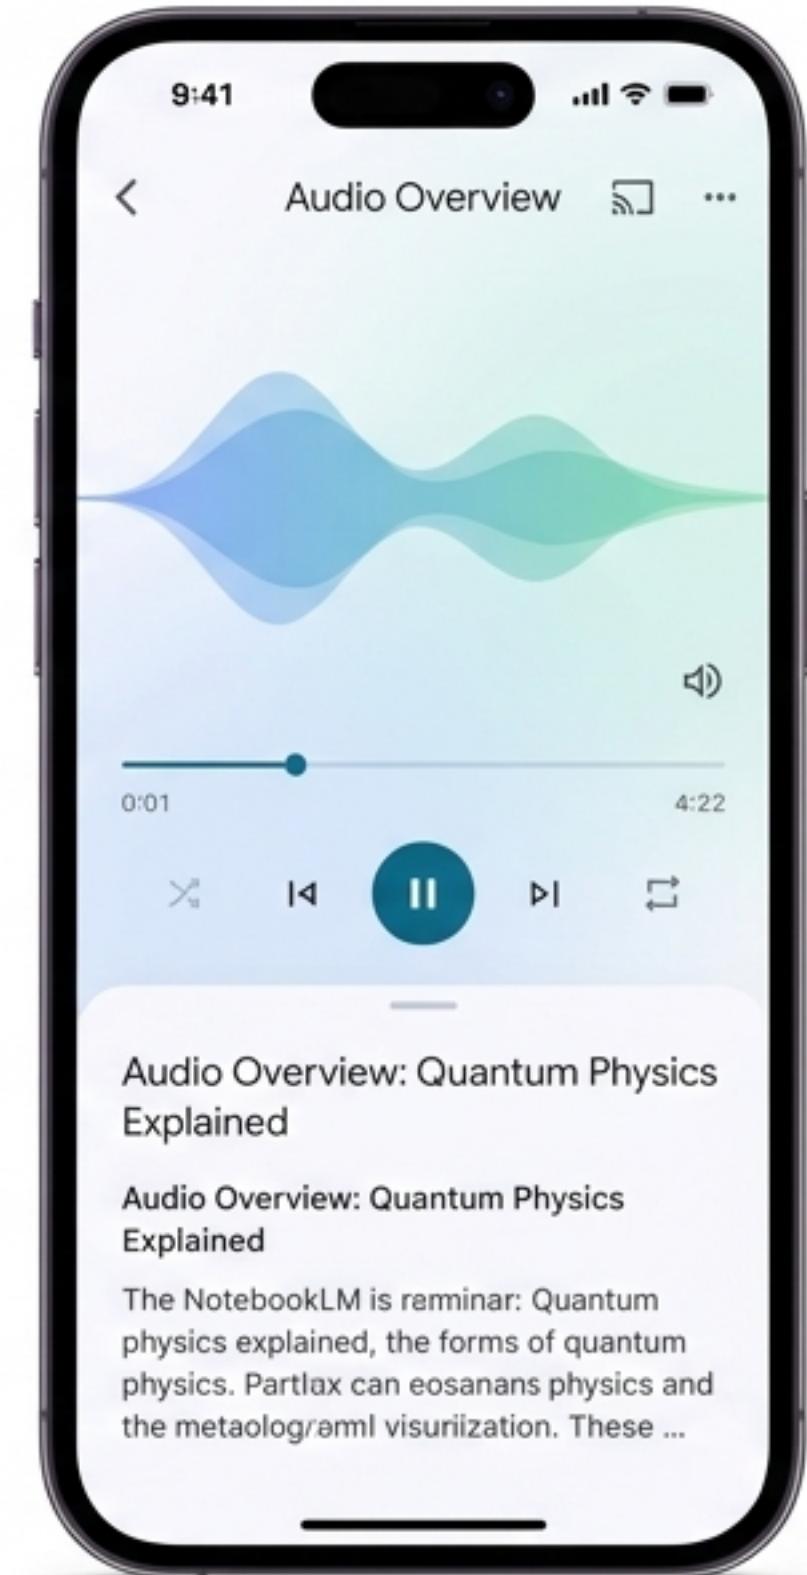

Understand Anything, Anywhere

The **NotebookLM** mobile app brings the core features to your phone and tablet. Get insights in the moment, listen to Audio Overviews on your commute, and review materials with flashcards and quizzes wherever you are.

Key Mobile Features:

- Ask questions about your sources.
- Listen to and download **Audio Overviews** for offline playback.
- Review with Flashcards and Quizzes.
- Share content directly to NotebookLM from your device's browser, PDF viewer, or YouTube app.

Available for Android (10+) and iPhone/iPad (iOS 17+) in 180+ regions.

Plans for Everyone

NotebookLM

Free for individuals to get started.

- ✓ Built with Gemini
- ✓ Upload PDFs, websites, Google Docs, Slides, YouTube URLs, and more
- ✓ Create one-click summaries, FAQs, and briefing docs
- ✓ Generate Audio Overviews and listen on-the-go
- ✓ Ask questions for deeper insights with citations

NotebookLM in Pro

Everything in NotebookLM, plus:

- ✓ **5x more** Audio Overviews, queries, notebooks, and sources per notebook (up to 300 sources)
- ✓ **Premium Features:** Create shared notebooks for your team ('chat-only' access option) and get usage analytics.
- ✓ **Additional privacy and security** (for Workspace, Education and Cloud customers).

How to Upgrade: Available through Google One, Google Workspace, and Google Cloud plans.

Your Data is **Protected**

We are committed to protecting your privacy. How your data is handled depends on your account type.

For Personal Google Accounts

Your data is protected and is **not used to train our AI models** unless you explicitly submit feedback (e.g., using the thumbs up/down feature). When feedback is submitted, our team may review the content to improve the product.

For Google Workspace & Education Accounts

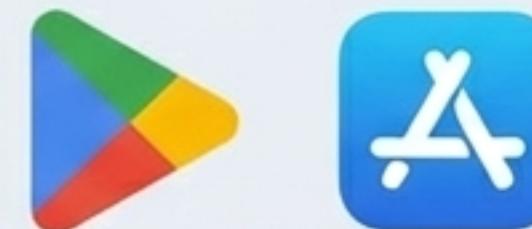

Enterprise-grade data protection applies. Your uploads, queries, and NotebookLM's responses **will not be reviewed by human reviewers** and **will not be used to train AI models**, even when you provide feedback.
